EDUCATION

New Mexico State University
B.S. Computer Science
May 2022 (GPA 3.0)

New Mexico State University
Master's in Computer Science
2024 (GPA 3.0)

CAREER HIGHLIGHTS

Teaching Assistant.-

Coordinated with a manager to grade 60+ students. Taught in multiple coding languages. Created evaluation frameworks and scripts.

Drone Flight

Intern: Participated in weekly meetings. Worked in a team to complete goals and evaluated multiple software and hardware platforms. .

EXPERTISE

- C.C++
- Godot Script
- Education,Explanation

PROFESSIONAL SUMMARY

I am interested in growing as a developer in multiple avenues. My experience as a TA helped me develop as a coworker and teammember while still solving technical challenges.I hope to gain the experience necessary to grow in the software development field and am open to many exciting challenges.

EXPERIENCE

St.Marks School - El Paso, TX
IT Helper and Substitute Teacher, Current

Assisting in IT infrastructure as well as a on call substitute teacher focusing on computers and library.

New Mexico State University - Las Cruces, NM
Masters Thesis on User Immersion, 2023– 2024

For my Masters' thesis I was interested in examining the impact of algorithmic changes on the user's immersion experience in a procedurally generated play environment.

- Developed a game in Godot that used procedural generation to create two states of a dungeon.
- Used parametric conditions to study specifically the effect of the algorithm on immersion.
- Submitted for and received IRB approval for human studies.
- Conducted user studies in a short time frame and compiled results into usable data.
- Created thesis accepted by and under the council of a university committee.

New Mexico State University - Las Cruces, NM
Teaching Assistant, 2022 – 2024

Worked with professors to create a comprehensive workload depending on class. Conducted office hours and worked with students in lab to complete programming assignments.

Object Oriented Programming(C/C++) -3 Semesters

- Designed coursework, evaluation, and automated evaluation frameworks
- Guided students through programming challenges
- Evaluated over 60+ programs weekly on completeness

Modern Web Technologies (Javascript/HTML/CSSt) - 1 Semester

- Assisted students with project completion
- Evaluated programs on completeness

KEY SKILLS

JOB SPECIFIC

- Familiar with Java, C, C++, JavaScript, python, HTML, CSS and SQL
- Proficient with Git and GitHub navigation
- Experienced with Godot, Unity and Unreal.
- Proficient in Conducting User Research.

INTERPERSONAL

- Ability to assist others at varying levels of coding experience and a wide range of problems.
- Have interfaced and worked with different managers regularly to achieve pre-established Goals.
- Able to communicate well to a group of individuals about progress on a project.

ADMINISTRATIVE

- Able to manage a complex work schedule with both individual work and monitoring those who may need assistance.
- Understands the paperwork and approval needed for enrolling test subjects.

2018-2022

EXPERIENCE CONTINUED

Senior Project - 1 semester

- Guided students to more accurate in-scope design requirements
- Evaluated student progress throughout the semester as a team

Emerging Technology Ventures (Remote)

Drone Flight Software Developer Intern, Summer 2020

Worked on a team to create flight control code in a simulated environment.

- Worked on a team to complete software goals including weekly updates
- Evaluated multiple drone and software platforms
- Used simulation software to test flight control software.

Cyberpunk 1010

Personal Project, August-December 2018

Created a two dimensional dungeon crawler base for a personal project outside of my coursework. Used this project as practice for UX/UI design and file management.

- Had a inventory system including shops and working save file system.
- Basic combat implementation.
- Ended up leaving project due to UI library limitations.
